DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Doreen Trujillo on January 30, 2008. The details of the examiner's amendment are as follow:

- The language of claim 6, line 5, which reads "...the spacer having a free end remote from the conainer..." is amended to read "...the spacer having a free end remote from the container..." in order to correct for the typographical error "conainer".
- The language of claim 10, line 2, which reads "...and is closable to holed the stemming material..." is amended to read "...and is closable to hold the stemming material..." in order to correct for the typographical error "holed".
- Claim 6 is amended such that the following underlined limitations are added immediately after the portion of claim 6, line 9, which reads "...means of the closure". The newly added limitations reading: "the blasting accessory further comprising a deformable seal formation in the form of a rim for sealing against an inner periphery of the drill hole to

form a plunger for holding a pressure generating or shock wave generating substance adjacent the container and remote from the spacer."

- Claim 11 is cancelled since it no longer further limits claim 6.
- The language of claim 12, line 1, which reads "A blasting accessory as claimed in Claim 11..." is amended to read "A blasting accessory as claimed in Claim 6..." in order to correct the dependency of claim 12 since claim 11 has been cancelled.

Allowable Subject Matter

Claims 1-10 and 12 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Collinsworth et al (7052092), Greene (2047774), Russel (2449511), Thunell et al (3366056), Learnard (351273), and Knox (465410).

The following is an examiner's statement of reasons for allowance: Applicants independent claims 1 reads over what is considered to be the closest prior art (Collinsworth) with regard at least to claim limitations directed to at least a method of blasting or breaking rock by forming a stemming plug by filling a defined volume container with corresponding volume of stemming material, said container being closed with a openable and closable closure to retain said stemming material, said container being connected to a spacer that abuts the bottom of a drill hole at one end and supports said container above the bottom of said drill hole at an opposite end, placing a

pressure generating or shockwave generating substance atop said container such that said container is located between said spacer and said pressure generating or shockwave generating substance, and initiating said pressure generating or shockwave generating substance in order to propel said stemming material at speed toward the bottom of the drill hole. Applicants independent claims 6 reads over what is considered to be the closest prior art (Collinsworth) with regard at least to claim limitations directed to at least a blasting accessory comprising a defined volume container for holding a corresponding defined volume of stemming material, a removable closure closing said container in order to retain said stemming material, a spacer connected to the bottom of said container for supporting said container at a predetermined distance above the bottom of a drill hole, said blasting accessory further comprising a deformable seal at a top end of said container capable of sealing against an inner periphery of said drill hole, said deformable seal forming a plunger capable of holding a pressure generating or shock wave generating substance atop said container such that said container is located between said spacer and said pressure generating or shock wave generating substance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GABRIEL J. KLEIN whose telephone number is
